

Intrafix® Primeline

Meets all your routine fluid administration needs with state-of-the-art technology and great value

Fluid administration

Meet today's challenges ...

Intrafix® Primeline – Reliable quality, established in practice

The universal practicality of the Intrafix® IV set line has been proven billions of times worldwide. User-friendly designed core elements like the drip chamber and roller clamp enable secure gripping and easy handling.

B. Braun's high-end production technology and unrivaled degree of automation guarantee consistently dependable high quality.

A selection of sets – with features beyond the standard – offers added effectiveness and comfort for both nurse and patient. Intrafix® Primeline IV set comes with tubing made with PVC but DEHP-free, optionally also PVC-free. Available as well with a longer tubing that gives nurses greater flexibility for handling patients, facilitates transport and allows the patient more freedom of movement.

Intrafix® Primeline offers everything a standard IV administration set needs – perfect to the last detail. Ideal for your day-to-day environment.

... the most efficient way

Universal, clear ISO spike:
Easy to spike

Long drop former, 20 dr. Δ 1 ml,
Highly transparent dome design
Good to see drop forming

The ideal filling level
to prevent air entrainment

Elastic pump chamber:
Easy and fast priming

Clear PVC tubing, DEHP-free,
good clarity, good handling flexibility
and priming ability, untangles easily
Standard 150 cm and 180 cm in length

Screw-tight luer-lock fitting
For safe connection to the
patient access

Bacteria-tight
air vent,
with snap cap

Easy to open and
close tightly even
during transportation

Unique push ring
Secure gripping

Drip chamber
PVC-free

Particle filter
15 μ m

NEW: DEHP-free

PVC tubing
DEHP-free

Spike dock for secure discard
The spike dock is an added
feature that protectively
covers the drip chamber
spike after use.

Comfortable tube dock
Patient connector and the
tubing can be hooked into
the side notch after priming
for stand-by procedures.

Luer-Lock fitting for
safe connection
Insert the connector tip,
screw in tightly with a quick
twist. Prevents inadvertent
disconnection.

NEW!
Good to control flow rate.
Roller Clamp, new in shape
and function: comfortable
to hold and handle, more
accurate to set the droprate,
easier to roll, instant drop
speed adjustment.
The large-dimensioned roller
clamp enables secure gripping.

All Design features in accordance with ISO 8534-4/8
For further information about the new Roller Clamp and the DEHP-free tubing please ask your sales representative.

- ### User benefits*
- High-profile class IV Sets, best suited for administering of all kind of infusions
 - Big variety of different product options
 - Highest handling comfort
 - Universally suitable also as a non-dedicated IV Set for appropriate infusion-pumps. Proven upto 2 bar positiv pressure

* depending on product type/configuration

One spike fits all

The universal, vented spike fits tightly on all container types. Insertion is just as smooth as removal. Fluid inlet and air outlet are separated at different levels to prevent inflowing air from inadvertently entering the fluid channel.

Ergonomically designed

Larger and longer than conventional, this drip chamber is ideally shaped to fit firmly in your hand. Its center ring ensures secure gripping. Pump drop detectors are easily attachable. The soft, flexible lower pump chamber enables one-click fluid level setting.

The fully transparent, dome-shaped upper part allows a quick drop rate check even in poor lighting.

The large filter area retains particles $\geq 15 \mu$ m.

Choose your best Intrafix® Primeline option

Intrafix® Primeline – choices that enhance the overall function of IV administration

You can choose from a variety of add-ons e.g. that automate priming, make parallel pressure and gravity infusions safer, simplify injection and piggybacking procedures and many more.

Eurofix® Injection Site with handy, safe grip plate

Ensures secure drug injection and piggybacking with its latex-free, resealable port. Air-free priming.

Safeflow cap-less injection valve

Offers convenient and safe needle-free access for injection, aspiration or parallel infusions as a closed system, latex-free.

Infuvalve® Back Check Valve prevents backflow

More safety during parallel pressure and gravity infusions. No blood reflux, latex-free.

Discofix® C Stopcock, drug resistant

For convenient needle-free injection, aspiration or parallel infusion.

Luer-Lock connector with PrimeStop Cap

Ensures automatic priming and prevents fluid from dripping out. Maintains closed system until connected to the patient.

Neutrapur® PVC-free

Particularly patient-friendly. No plasticizer leachables. Ecological disposal.
